

Smoke test with Jimmy Joe's 1 year experience

Jimmy Joe started in a company with a new project.

The business team always provides a release plan -> what are the client's features? What is the due release date? Then the developpers & testers start to work.

Jimmy Joe's experience about Smoke

Jimmy Joe's contract is ended after working 1 year.

On Jan, he is on the market to find a new job.

Interviewer: Can you tell me about your Smoke test?

Jimmy's answer:

- In my current team, we run **Smoke test** to determin the Major Functionality of the application
- Our smoke test runs every day morning at 7 AM through Jenkins, in the QA env
- There are 85 sceanrios in my Smoke test, it takes 25m to run
- I start my work by checking email evry day, Jenkins send me the Smoke test reult.
